MANGALICA SHOULDER

Boneless - REF: DPG

Raised in Hungary and naturally air dried in the Spanish mountains.

In 1991 we discovered a forgotten breed on the brink of extinction: the Mangalica pig.

An indigenous pig from Hungary with the same Mediterranean bloodline as the Iberico pig but fully adapted to the cold steppe.

Its penchant for roaming and its natural feeding on corn wheat and grasslands, along with the maturity it reaches makes it ideal for the highest quality cured products.

The fresh meat is brought from Hungary to Spain, where the natural curing process takes place until each product reaches its point of perfection.

The Mangalica shoulder has just natural ingredients, no additives. The average curing time is 24 months.
